Kyun zaroori hai? Windows laptops par Edge aur Windows search ka default search engine Bing hai, aur Bing Maps ka data Microsoft ke apps aur AI search tools mein bhi dikhta hai. Jo customer Google nahi kholta, wo bhi aapko dhoondh paaye.

STEP 1 — BING PLACES KHOLIYE

1

Google par **"Bing Places for Business"** search kijiye, ya seedha **bingplaces.com** kholiye.

Get started / Sign in dabaiye. Microsoft, Google ya Facebook account se sign in ho sakta hai.

> Tip: wahi Gmail use kijiye jo aapki Google Business Profile ka owner/manager hai. Isse Step 2 ek click ka ho jaata hai.

STEP 2 — IMPORT FROM GOOGLE BUSINESS PROFILE

2

"Add your business" mein **Import from Google Business Profile** option chuniye. Details haath se mat bhariye — zyada log yahi galti karte hain.

Google sign-in window aayegi: same Gmail chuniye aur Bing ko listing padhne ki permission dijiye.

Import hoti hain: **Naam** **Address** **Phone** **Timings** **Category** **Website** **Photos**

STEP 3 — SELECT, IMPORT, CHECK

3

Jo listing(s) Bing par chahiye unhe **select** kijiye aur **Import** dabaiye.

Dashboard mein details ek baar **check** kijiye: phone number, timings aur category Google wali listing jaisi hi honi chahiye.

Google par verified listings aksar Bing par bhi seedha verify ho jaati hain. Agar Bing verification maange, toh phone / email / postcard wala option follow kijiye.

Listing kuch hi dino mein Bing Maps par live ho jaati hai.

LIVE HONE KE BAAD: 5-MINUTE CHECKLIST

- ☐ Category sahi ho — wahi primary category jo Google par hai
- ☐ 3–5 achhi photos: bahar ka board, andar, team, kaam
- ☐ Website link aur booking / WhatsApp link add kijiye
- ☐ Google par koi bada change kiya? Bing Places mein bhi update kijiye

COMMON SAWAAL

Kya Bing Places free hai? Haan, listing banana aur manage karna free hai.

Import ke baad Google listing pe asar padega? Nahi. Google listing waisi hi rehti hai; Bing par ek copy banti hai.

Import ka option nahi dikh raha? Check kijiye ki aap usi Gmail se sign in hain jo Google Business Profile ka owner/manager hai. Nahi toh "Add manually" se bhi listing ban jaati hai.
